SKILLS

-Lighting and sound design   -Adaptability
-Attention to detail   -Creativity
-Strong communication skills

EDUCATION

Washington State University, Tri-Cities, WA   Expected May 2029
Bachelor of Science in Software Engineering

PROJECTS

DTC Group Project, WSU class project   2024
- I walked around campus to see how many designs I could spot that served a lack of purpose, then I picked a design that stood out as the most problematic, and solved how that one design can be more accessible for everyone on campus.

The Curious Savage, Production at the Richland Players theater   2024
- I showed up three to five times a week to learn how the lighting and sound works in the theater, assisted actors backstage, and overall I helped the play run smoothly by moving the set and making sure the props were where they needed to be.

EXPERIENCE

Community Service, Tri-Cities Animal Shelter   2024
- I go once a week to walk dogs and make sure all the animals are walked for 10-30 minutes each so they can get their basic needs and enrichment time met.

Dog Walker and Cat Sitter, Richland, WA   2023-2024
- While the owner is away I will stop by their home to take care of 1-3 animals by making sure they get food, water and the quality time they need for 30 minutes each session.
- I communicated to the client how and what I was doing while at their home.

Stagehand, Richland Players, Richland, WA   2024
- I worked backstage in lighting, sound effects, building the set, and effects on stage.
- While working on a production I would also assist with lighting or sound in other shows.
